CLARESHOLM ALTA, JAN. 16, 1912.

NO. 47

Sweet Lavender "Took"

To the manifest pleasure of a very large audience "Sweet Lavender" was played on Monday evening at the Open House. The work of the amateurs was a revelation to many who had not looked forward to such finished art. This town is certainly fortunate in possessing so many with histrionic talent. The story of the play was very interesting and afforded an opportunity to each of the players to show his or her ability. Unlike many plays in which there are but two or three principal characters, this play is remarkably well-balanced. Barring some slight indications of nervousness which appear frequently in first night performances even with seasoned actors, the lines were well prepared and clearly and naturally delivered. Robin Adair was splendid in depicting the death-brained booby suddenly confronted with a measure of disgrace and the loss of his fortune through the absconding of his trusted partners. Rev. Laird carried off with honors the part of the physician who comes with nature to the aid of his profession to the ultimate happiness of all but who was ever ready with the disclaimer "It's no business of mine." It was a surprise to all the ease with which Mr. Sanderling entered into the spirit of the American whom he portrayed. For a thorough Englishman, his work was remarkable in this character. The spirit of the character, Ruth Bolt, carrying her secret, was entered into with excellent delicacy by Mrs. (Dr.) Stephenson and sustained with faithful accuracy throughout the part. Mr. Langmuir in the character of Mrs. Griffiths, lent to her part the "hauteur" of the "grande dame" which when met by misfortune softened to womanliness. The character was admirably presented. Miss Margaret Mitchell was excellent in the character of Minnie and carried her role very naturally. Mr. McFadden held the only part that offered no scope for spectacular work but he performed the part allotted very well indeed. Mr. Walton had a minor comedy role and took it very well. The character of Clem was left to the lot of Mr. G. C. Fells who shared with Miss Strang the centre of the stage in all the "situations," and who carried rather heavy part through with perfect naturness. Of his acting, it is his finer gestures and expressions that show his ability. The most difficult parts of stage delineation are appropriate gentleness and naturalness of expression. Mr. T. de C. Fells possesses these characteristics in generous quantities. Miss Strang in the title role, was splendid. Her part was difficult but she presented it with the skill of a more experienced actress. Of all the characters in stage portrayal, the young girl just crossing the threshold of young womanhood requires the most sustained effort and correct interpretation to produce the attractiveness of the other. To Miss Bishop credit for the successful staging of the play is due. He has selected the scenery character of Phony, with its rapid transits from the ridiculous to the pathetic, with the true touch. Mr. Bishop's experience in Winnipeg stands him in good stead and his hand was seen throughout the entire performance. The costumes were very appropriate to the parts. It is hoped that these copies appear one more before the winter is over.

Meadow Creek News

A Masquedade Ball will be given at the School House on Friday Jan. 19th. Messrs. Foxglove, Vadnais and Bell form the committee in charge.

The Meadow Creek 1912 crop has all been threshed at last.

J. I. Vance has received returns from two car loads of wheat. Both graded No. 1 Northern. Mr. Vance has a car load of first class hops almost ready to ship.

What has happened to the Meadow Creek Union of the C. P. A. has been very little of its activities these days. Miss Rose Vadnais has returned to Meadow Creek for the winter.

C. B. Marshall has recently returned from a lengthy sojourn in Vancouver. He believes that Meadow Creek is the best spot in Canada after all.

Negotiations for the purchase of the Nelson Ranch have been broken off. Mr. Nelson has decided not to sell his land or cattle before spring.

Lawrence Maltby entertained his numerous friends at a New Year's Day dinner.

The dues given by the Carleton Place of the U. F. A. was attended by some of the Meadow Creek people.

Mr. Good has returned from a two week's vacation and school has commenced again.

S. S. Convention Well

Attended

The Clareholm District S. S. Convention, which is interdenominational in character, was held at the Methodist Church here, on Wednesday afternoon and evening. The Meadow Creek schools were represented by Rev. Gardiner, the Presbyterian missionary in charge of the work there. Rev. Simpson, a wife and son, and Mr. J. Strang represented the school at Badger Plains. No representation was present from Gramham. The afternoon session was attended by over 25 and were rewarded by very inspiring addresses from F. E. Werry, ex-sec. Alberta Association and by very interesting papers in the hands of Mrs. McKinney and Rev. Simpson, of Staveland. In the evening over 50 were present and the session brought forth addresses that bristled with helpful points by F. E. Werry and similarly enjoyable solos by Miss Simpson, Clareholm and Rev. Gardiner, Parkland. To the morning program was added an address of a very practical nature, "How to Run a School in Missions," by Mr. Gardiner.

The election of officers in the evening resulted as follows: President, Wm. Knight; Vice President, Robt. Whitehead; Grammar; Sec. Treas., F. Bouffard; Representative to the Provincial Board, Wm. Knight. The superintendents of departments are: Elementary, Miss Ruth Doyle; Adult, J. J. Strang; Training, Mrs. McKinney; Missionary, J. G. Barbour; Temperance, E. G. Barbour; Home, Mrs. D. C. Elmes. A meeting of the executive will be held here on February 8th.

Lays Blame on Farmers

Sir Horace Plunket, member of the British House of Commons and world leader in the agricultural co-operative movement, said in an address before the Wisconsin legislature on Monday night that farmers were responsible largely for the high cost of living because they failed to cooperate in reducing the cost of the distribution and in eliminating the middle man.

Afterpou Tea

The Ladies' Aid Society of the Presbyterian Church will serve afterpou tea at the home of Mrs. George Simpson, Wednesday, January 24th, between the hours of 3 and 5 p.m. All are cordially invited.

Important to Gas-Users

It may, or may not, be generally known by gas-users that a permit is necessary for the use of the same and that a failure to secure such permit may cause annoyance and loss in case of fire. The forms that were supplied by the Gas Co. have proved incorrect and it is the part of wisdom for the insured, who is using gas, to secure from the agent of the insurance company interested, the correct permit. A circular sent out by the Underwriters' Association states the conditions for the use of natural gas which are as follows:

"All pipes and fittings must be made in all cases where required to the square inch, and a certificate of such work furnished to the consumer. A pressure regulator must be placed on service pipe and so set that the pressure at which the gas is used shall not exceed 4 ounces to the square inch."

"A charge of 25 cents to building rate is made in all cases where regulations are complied with."

"Gas should not be burned at night unless the fire is all turned down and the regulator supply is in dwelling."

All fires must be turned off at night, unless a competent rule is left in charge. When this rule is not observed a charge of 25 cents must be added to the building rate."

The assured is required to state that the above conditions have been complied with, and further that the pipes have been tested and that a certificate has been filed to that effect with the assured."

There is no stipulation as to whom shall sign the certificate but it is presumably the officer appointed by the council to inspect such installations."

This is a very important matter! Insured gas-users as a failure to secure the permit might invalidate the insurance. Act promptly and take up the matter with the agent of the insurance company at ONCE.

January Press Notice

Rod and Gun (published by W. J. Taylor, Limited, Woodstock, Ont.) for January has a somewhat striking cover, being a reproduction of a lady fox farmer. The same issue contains an article on the Culture of Black and Silver Foxes, under the Apocryphal Value. In addition, there are stories of outdoor life and sport representative of both the Eastern and the Western provinces. "Along the Mighty Mackenzie to the Arctic Ocean," descriptive of a trip from Edmonton to the last post on the Mackenzie River; A Wild Goat Hunt in the Rockies; The Bear that kept an Appointment; Filling a Big Game License in New Brunswick; Mink Trapping; Good Luck at the Oklaheok Hunting Camp and Other news in prose, rhyme, cartoon, etc. is made an interesting feature of this Canadian sportsman's magazine. An interesting note under the Sportsman's Column, dated December 26th, is to be found in the "The Fox Farm" column, along with other news of the month.

One line received from the Clareholm Review, dated January 16th, states that the Clareholm Review is a very satisfactory work of the Clareholm Review.

Brandon Convention in Brief

The Grain Growers at their convention which was held in Brandon last week affirmed the stand taken on the farmers' political platform of December, 1910. Considerable time was devoted to the subject of co-operation. A report of the working of the co-operative plan at Shook Lake indicated the saving of \$380 in one year to members. At Neepawa a discussion in the progress of information, shares being sold at \$10. The intention of this association is to preserve the regular retail price and return to its members the profits as a bonus. A flour mill at Gladstone supplied flour co-operatively. A resolution recommended that the Grain Growers' Grain Co. begin a negotiation for cheaper gasoline and coal oil. Another resolution asked the Co. to negotiate with smaller flour mills, with the view of providing farmers with flour at lower prices than those of the larger mills. With regard to railway rates, the executive are to bring before the Railway Commission the injustice of charging full rates to the lake-front on grain, and to load at local points. Many instances of the discrepancies between the weights at initial points and the terminal points brought forth a strong resolution calling for the investigation of the weighing system at terminal points. A resolution that have not reached effecting the opportunity of the Board of Grain Commissioners to adopt regulations permitting the sampling of cars by boards of trade or other competent bodies to act as a check on the inspection department. Also that the same board of commissioners definitely fix on the certificates, the maximum amount to be deducted by hospital elevators from any car in the process of drying. The executive was also instructed to take up the matter of the grievance of the farmers who are not compensated by the railway companies and to secure on a reasonable explanation of the delays and if this is not furnished to institute a test case by the association for damages for loss of delay.

The convention placed itself on record as opposing the imposition of a duty on rough lumber and as favoring the free trade in lumber by all means and in fact of all natural resources in the public interest.

After a lengthy discussion on the matter of reciprocal demerit the convention was left by resolution to the executive to take up with the railway commission. The convention unanimously endorsed the work of the Grain Growers' Grain Co. and the commission of 1 cent per bushel for export, which is the same as on wheat, amounts to considerable more on a pound basis. The finding of the convention was a resolution to request a reduction of one-half cent was passed. The federal government was asked to conduct an inquiry into the question of agricultural credit to provide cheaper money for the farmers. The executive was asked to confer with the implement manufacturers, and in April to call a meeting of the farmers' representatives.

The following resolutions were adopted by the Grain Growers' Grain Co. and the commission of 1 cent per bushel for export, which is the same as on wheat, amounts to considerable more on a pound basis. The finding of the convention was a resolution to request a reduction of one-half cent was passed. The federal government was asked to conduct an inquiry into the question of agricultural credit to provide cheaper money for the farmers. The executive was asked to confer with the implement manufacturers, and in April to call a meeting of the farmers' representatives.

Grain and Poultry Show at Last

At last this district is to have a Seed Grain and Poultry Show. Our grain exhibits have been going to help out the display in other shows and our prize birds have been exhibited in other towns but are unknown to most of our own people. With commendable judgment, even if somewhat belated, the Clareholm Agricultural Society have decided upon an exhibition and though we have not been recording the favor of the price list we can only imagine that some really good prizes are being afforded for the exhibits. On Saturday, January 26th, the entries close. This gives over a week for those who may have been overlooked with an announcement to prepare for the show. On Tuesday, January 28th, at 10 a.m. all the poultry exhibits are to be in the I. O. O. F. Hall. At 2 p.m. of the same day the seed exhibit is to be in the Hall. On Wednesday, January 29th the show opens to the public at 11 a.m. and remains open all p.m. There is a chance to see the public see what the district has done in the seed grain line and also to let the adjoining gaze of bird keepers, root show chickens that are being groomed so carefully for the Fair. For further particulars and prize lists, J. R. Witt awaits your application.

Show Your Appreciation

It is well to remind the people of Clareholm of the announcement of the Clareholm Society made last week, of the "At Home" to be held in the Open House on Thursday of next week. The work of the Society in bringing to the surface and fostering in its development the latent musical talent of the adults and also the children, is a most commendable work. The Society have let the fact that they have in preparation "Rip Van Winkle" a musical interpretation of this well-known story classic, and in a short time will favor the public by its production. Like all societies of a similar nature, financing is a very trying part. To show appreciation of their work in a tangible manner, the "At Home" on Thursday next affords the opportunity. The Clareholm Society are offering a musical program, refreshments, games, and social intercourse, for the entertainment of those who attend the "At Home" and are charging a modest fee of 50 cents for the evening. Please bear this in mind and do not make any other engagement for Thursday, January 26th at 7 p.m.

manufactured and other animal products in western Canada is sold at a lower price to the consumers in other countries than for domestic consumption.

"And whereas custom duties on agriculture and animal products are seriously imposed in the interest of farmers, the executive is requested to secure a reduction of one-half cent per bushel for export, which is the same as on wheat, amounts to considerable more on a pound basis. The finding of the convention was a resolution to request a reduction of one-half cent was passed. The federal government was asked to conduct an inquiry into the question of agricultural credit to provide cheaper money for the farmers. The executive was asked to confer with the implement manufacturers, and in April to call a meeting of the farmers' representatives."

"And whereas, producers, in order to bring with the natural law of supply and demand, facilitates the farming of combines and trusts among manufacturers, transportation companies and financial institutions. "And, whereas, living fees imposed on laboring men, artisans and farmers alike, the executive is requested to secure a reduction of one-half cent per bushel for export, which is the same as on wheat, amounts to considerable more on a pound basis. The finding of the convention was a resolution to request a reduction of one-half cent was passed. The federal government was asked to conduct an inquiry into the question of agricultural credit to provide cheaper money for the farmers. The executive was asked to confer with the implement manufacturers, and in April to call a meeting of the farmers' representatives."

The executive was asked to confer with the implement manufacturers, and in April to call a meeting of the farmers' representatives."

1912 Crop Figures

Ottawa, January 10. Final estimates of the yield and value of the principal field crops of Canada for the season of 1912 are issued today by the Census and Statistics Office of the Department of Trade and Commerce. Upon a total area under field crops of 32,474,000 acres a harvest of 7,780,000 acres, of which 281,000 acres represents the harvested area of fall wheat grown principally in Ontario and Alberta, but also to a limited extent in Manitoba, Saskatchewan and the Northwest Territories. The total production of wheat was 19,230,000 bushels of the value of \$122,322,000. Fall wheat produced 16,280,000 bushels of the value of \$107,530,000. This upon 9,210,000 acres yielded 191,753 bushels of the value of \$1,143,966.00. Barley upon 1,115,200 acres yielded 4,010,000 bushels of the value of \$24,053,000 and flax upon 1,677,800 acres, yielded 21,891,000 bushels of the value of \$10,020,000.

The quality of the crops of cereals has shown by average weight per bushel that it is somewhat inferior to that of last year in the case of wheat, rye, peas, mixed grains and flax, but is superior in the case of oats, barley, buckwheat, beans and corn for husking.

In the three Northwest provinces of Manitoba, Saskatchewan and Alberta the production of wheat is estimated at 18,922,000 bushels compared with 19,048,000 bushels in 1911, of value \$121,758,000 compared with \$122,322,000 and of 16,280,000 bushels compared with 16,280,000 bushels in 1911, of value \$107,530,000 compared with \$107,530,000. The wheat production of 1912 in Manitoba was 588,000 bushels from 2,653,100 acres at 22.2 bushels average per acre. In Saskatchewan 95,000 bushels from 4,801,500 acres or 19.2 bushels average, and in Alberta 30,740,000 bushels from 1,417,200 acres or 21.6 bushels per acre.

Conditions as affecting live stock are reported to have been much the same as those of 1911. Mild weather throughout the fall and up to Christmas enabled farmers to economize their feeding supplies and live stock have entered winter quarters in excellent condition.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. On the other hand oats yielded about 131 million bushels more than in 1911 and the following crops also show more or less excess yield: barley, buckwheat, mixed grains, flax, potatoes, turnips, etc. fodder corn, sugar beet and alfalfa. The average yields per acre for the year 1912 compared with 1911 are as follows: Wheat 20.2 bushels against 20.4 bushels in 1911, value 1.143966 against 1.143966; barley 18.3 bushels against 18.3 bushels in 1911, value 1.143966 against 1.143966; flax 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; mixed grains 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; peas 13.7 bushels against 13.7 bushels in 1911, value 1.143966 against 1.143966; beans 11.1 bushels against 11.1 bushels in 1911, value 1.143966 against 1.143966; corn for husking 25.0 bushels against 25.0 bushels in 1911, value 1.143966 against 1.143966; oats 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; buckwheat 22.2 bushels against 22.2 bushels in 1911, value 1.143966 against 1.143966; turnips 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; potatoes 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; sugar beet 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; alfalfa 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. On the other hand oats yielded about 131 million bushels more than in 1911 and the following crops also show more or less excess yield: barley, buckwheat, mixed grains, flax, potatoes, turnips, etc. fodder corn, sugar beet and alfalfa. The average yields per acre for the year 1912 compared with 1911 are as follows: Wheat 20.2 bushels against 20.4 bushels in 1911, value 1.143966 against 1.143966; barley 18.3 bushels against 18.3 bushels in 1911, value 1.143966 against 1.143966; flax 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; mixed grains 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; peas 13.7 bushels against 13.7 bushels in 1911, value 1.143966 against 1.143966; beans 11.1 bushels against 11.1 bushels in 1911, value 1.143966 against 1.143966; corn for husking 25.0 bushels against 25.0 bushels in 1911, value 1.143966 against 1.143966; oats 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; buckwheat 22.2 bushels against 22.2 bushels in 1911, value 1.143966 against 1.143966; turnips 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; potatoes 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; sugar beet 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; alfalfa 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. On the other hand oats yielded about 131 million bushels more than in 1911 and the following crops also show more or less excess yield: barley, buckwheat, mixed grains, flax, potatoes, turnips, etc. fodder corn, sugar beet and alfalfa. The average yields per acre for the year 1912 compared with 1911 are as follows: Wheat 20.2 bushels against 20.4 bushels in 1911, value 1.143966 against 1.143966; barley 18.3 bushels against 18.3 bushels in 1911, value 1.143966 against 1.143966; flax 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; mixed grains 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; peas 13.7 bushels against 13.7 bushels in 1911, value 1.143966 against 1.143966; beans 11.1 bushels against 11.1 bushels in 1911, value 1.143966 against 1.143966; corn for husking 25.0 bushels against 25.0 bushels in 1911, value 1.143966 against 1.143966; oats 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; buckwheat 22.2 bushels against 22.2 bushels in 1911, value 1.143966 against 1.143966; turnips 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; potatoes 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; sugar beet 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; alfalfa 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. On the other hand oats yielded about 131 million bushels more than in 1911 and the following crops also show more or less excess yield: barley, buckwheat, mixed grains, flax, potatoes, turnips, etc. fodder corn, sugar beet and alfalfa. The average yields per acre for the year 1912 compared with 1911 are as follows: Wheat 20.2 bushels against 20.4 bushels in 1911, value 1.143966 against 1.143966; barley 18.3 bushels against 18.3 bushels in 1911, value 1.143966 against 1.143966; flax 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; mixed grains 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; peas 13.7 bushels against 13.7 bushels in 1911, value 1.143966 against 1.143966; beans 11.1 bushels against 11.1 bushels in 1911, value 1.143966 against 1.143966; corn for husking 25.0 bushels against 25.0 bushels in 1911, value 1.143966 against 1.143966; oats 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; buckwheat 22.2 bushels against 22.2 bushels in 1911, value 1.143966 against 1.143966; turnips 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; potatoes 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; sugar beet 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; alfalfa 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. On the other hand oats yielded about 131 million bushels more than in 1911 and the following crops also show more or less excess yield: barley, buckwheat, mixed grains, flax, potatoes, turnips, etc. fodder corn, sugar beet and alfalfa. The average yields per acre for the year 1912 compared with 1911 are as follows: Wheat 20.2 bushels against 20.4 bushels in 1911, value 1.143966 against 1.143966; barley 18.3 bushels against 18.3 bushels in 1911, value 1.143966 against 1.143966; flax 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; mixed grains 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; peas 13.7 bushels against 13.7 bushels in 1911, value 1.143966 against 1.143966; beans 11.1 bushels against 11.1 bushels in 1911, value 1.143966 against 1.143966; corn for husking 25.0 bushels against 25.0 bushels in 1911, value 1.143966 against 1.143966; oats 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; buckwheat 22.2 bushels against 22.2 bushels in 1911, value 1.143966 against 1.143966; turnips 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; potatoes 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966; sugar beet 14.8 bushels against 14.8 bushels in 1911, value 1.143966 against 1.143966; alfalfa 13.1 bushels against 13.1 bushels in 1911, value 1.143966 against 1.143966.

By comparison with 1911 the results of the year's harvest, both as regards yield and value, are upon the whole inferior. The average prices realized for most of the crops were somewhat less, whilst the yields from wheat, rye, peas, beans and corn for husking were also lower. Winter Cattle Feeding in Alberta

During the past three years tests were carried on at the Experiment Station at Lacombe, Alberta, to find out what amount of profit could be made from feeding steers in the open air on such foods as are easily available in the district. During the winter of 1903-04 six hundred head were fed, the following winter twenty, and last winter nineteen, of each breeding and yearling animals would have to be fed to maintain in a satisfactory manner. A consignment such as straw, cut shavings and hay was used, while the grain rations consisted of ground wheat, barley and corn all ground and mixed in varying proportions according to the relative available supply of these grains. A general time, part of which helped to form a feeding rack, was the only shelter afforded. Grain rations were fed on flat topped tables provided with an edging all around to prevent waste. Water was supplied in buckets in which were tin canisters to prevent ice forming.

For the benefit of those who are interested in this subject a pamphlet describing the methods followed and a summary of the results obtained in these tests has been issued by direction of the Honorable Martin Durnell, Minister of Agriculture, an Experimental Farm Bulletin No. 12 of the Second Series. In this it is shown that the difference between the buying and selling price per head the first year, after one hundred and nine days feeding, was \$3.65; the second year, after one hundred and fifty-five days feeding, \$5.19; and the third year, after one hundred and fifty-five days feeding, \$4.03. After deducting the actual cost of feed and labor, the net profits obtained were for the first year \$14.25; for the second year \$28.90; and for the third year \$15.55 per head. As high as \$128 per bushel was realized for ground wheat fed to the cattle.

This bulletin, which contains a number of helpful illustrations, is available to the farmers of the West on Provinces upon application to the Superintendent of the Experimental Stations at Lacombe or Lethbridge, Alberta.

Eastern farmers interested in the methods of feeding found profitable on the prairies may obtain a copy of this bulletin by applying to the Publication Branch, Department of Agriculture, Ottawa.

W.C.T.U.

CREDIT WHERE IT IS DUE

In special correspondence to the Union Signal, A. Symonds Ohlin, of Sweden, writes as follows:—Among the Scandinavians are the only ones that by statistics show a decrease in the consumption of alcohol. The friends of the disinterested management system abroad, and especially in England, declare this fact is owing to the Götterburg system which prevails in Sweden and Norway, but we who live in close contact with it, and thus have a first-hand acquaintance, know that though it is so, it has its advantages over the Anglican method of free competition, it has nevertheless certainly not had anything whatever to do with the decrease of drunkenness or the decline in the drinking habits of the Scandinavian people. Moreover, the Götterburg system does not touch the sale of wine and beer, it is only the mixture (beverage) that is under its control.

Our happy position is due to the tireless, unflinching work of our many different temperance societies. It is their steady forward movement which is changing public opinion and educating the nation. By persistent labor temperance sentiment is permeating all classes of society, and the advance has truly been rapid. In the thirties of the last century, the Swedish nation was at the bottom of the scale; it was then the most drunken nation of Europe. The first great reform step was the restrictive legislation of 1865, which put an end to all home distillation. In the twenties, the

Blue Ribbon Society and the I. O. G. T. commenced operations in Sweden, soon followed by other organizations, but it is during the last ten years that the temperance cause has become a power in the land, and the trend of public opinion has turned in favor of abstinence. No doubt the series of scientific temperance lectures and its different branches through out the length and breadth of the country (the sixty-third course having just now closed) has done much toward gaining this general favor.

As last night's lecture, the press more than half of the 250 political papers of Sweden are co-scientists in favor of temperance, and over one hundred are edited by total abstainers, among the number being two Stockholm dailies.

MADERO'S GREAT PROBLEM.

Call of Hungry People Must Be Satisfied to Bring About Peace. President Madero, who has no political question to solve, has no other than the administration depends entirely upon him. He is in a difficult position. His greatest problem is to satisfy the call of hungry people. Following 10 months of war, the people of Mexico, who are known as the "Hundred of Mexico," have for the first time been able to make several years' time over. Madero has been in the train at his own expense. He says the situation in his country is a serious matter.

"We learned persons hungry and famished, and they are in permanent peace in Mexico. When we are hungry it is easy to start a revolution. All a leader has to say to them is that by letting an hour, they can make their own lives in a month or a year by work. With children crying for food, with no object in existence, and with no hope of a more prosperous future, they do not pick their lives lightly."

"Some practical plan must be devised whereby the people will secure their own food. These great estates must be divided and sold. The people must be put in a way of supplying their daily wants and also producing that which is necessary to make a happy home."

"Better methods of agriculture must be taught. Where four bushels of corn is now being produced to the acre the Mexicans must be taught how to produce 60 bushels. The same is true of other products. The land used for a single man to be hungry or poor in Mexico. There is land in plenty for all."

Madero was once a member of the revolution. He had promised the people of Mexico a division of these estates. If he fails to carry out his promise, the people will not be a success and permanent peace will not be in Mexico. If he does not, then it is only a question of time until there is another revolution.

The people are fighting for food for themselves and for their families for the right to own their own homes, for the right to see their children educated and prosperous. If Madero can give them this, he will be a great benefactor and will be the real savior of Mexico. If he does not, then there will be no permanent peace.

"The solution is partly in the hands of the great landowners. If they will lay aside their feudal method and feeding tenants they can do much to bring about contentment."

"On my farm each tenant is allowed a small plot of land free of rent. That is for the use of himself and his children. When he is not using it, he can use it for me and I pay him fair and just wages."

"Not one of my men took part in the revolution. Many agents tried to induce them to go. They were happy and contented."

"With plenty to eat, with the ability to educate and provide for their children and with some outlook for their future, the politics of Mexico did not disturb them. They had no interest in who was President of Mexico. The revolution meant nothing to them. They had what they desired."

"It was for just such conditions the people of Mexico were fighting. Let the great landowners adopt such a policy and insurrections in Mexico will be impossible."

Any Part in a Storm.

In a northern snowstorm there is a wealthy but illiterate man who owns many horses and a large farm. He is over the sea by aid of a large atlas and a ten horse power machine.

"I've just had a letter," he said to a neighbor, "from one of my men, and he tells me he's been in a bad storm. I'll read you this letter and you'll tell me what to do. The waves rose like mountains. We were driven before the wind to the danger of our lives and put into great jeopardy."

"What I want to know," said the neighbor, "is where is Grand Jepperson? It's somewhere in the Mediterranean. But I can't find it on this map anywhere."—M.A.P.

The First Gingerbread.

The homely luxury, gingerbread, has been popular ever since the fourteenth century. It was then made and sold in Paris. In those days it was prepared with rose water made into a luscious and ginger and other spices, with sugar and honey, were kneaded into it. It was introduced into England by the court of Henry IV. for their festivals and was soon brought into general use, treacle being after a time employed in the manufacture instead of honey.

Sometimes Needed.

"Why do you have those glass cases with axe, hammer, crowbar, etc. in them?" asked a tradesman who had just returned from New York. "Oh, those are put there in case one ever wants a window open," replied the hardware man.

The Claresholm District AGRICULTURAL SOCIETY

The first Annual Show of

Seed Grain and Poultry

Will be held in the

Odd Fellows' Hall, Claresholm

On

**Tuesday and Wednesday
28th and 29th January**

Be Careful In building that Home.

POOR LUMBER gives a house a cheap shabby look which makes it difficult to rent. If it is to live in, you will be to proud to show it to your friends, and the fuel bills are large where low grade lumber is used. We make a specialty of high grade and class material that you will want to use. We have built up the largest retail business in Western Canada by being very fussy as to grades and selling better stuff than is sold elsewhere at prices as low as those asked for the inferior kinds. If your contractor uses **CROWN LUMBER** it means that he is a man who wants the best of everything and it is the best recommendation he could have.

Any person having this dog in his possession or who can furnish any information leading to his recovery, will be paid the above mentioned reward. Address: Thos. Moore, Calgary, Alberta.

of promise of marriage and for seduction against Martin James Armstrong of Nanton, last Monday.

The report in the current issue of the *Trade Gazette* to the effect that O. L. Reinecke, of Clareholm, had sold out his drug business at Graman to C. W. P. Gaudette, is inaccurate. The sale has not been made.

The "pandemonium" on northern Idaho and the eastern part of the state of Washington may be forestalled by a new state which may be named Roosevelt if the agitation in favor of this change is successful.

No indication as yet of the revival of the board of trade. Some of the business men have approved of our suggestion of a dinner as a "revival meeting." The town suffers as long as the board is practically defunct.

The ball given by the Alberta Rangers was considered a success. Over 50 couples enjoyed the dance. The ball was decorated with various colorful lights and other military paraphernalia.

On Wednesday evening a meeting was held in the Badger Place school house to organize an Epworth League. Mr. McGee has been agitating the matter and now his efforts will bear fruit.

Don't forget the senior hockey fixture for tomorrow afternoon. Parkland vs. Clareholm, at 3:30 p.m. Turn out and encourage the boys and they will give us some good hockey games during the season.

Quite a number of the ladies were present at Mrs. (Dr.) Steeles last Wednesday afternoon when the Ladies' Aid Society of the Methodist Church were the hostesses. Again today the ladies are meeting at the same home.

A very interesting meeting of the Y. P. S. C. E. of the Presbyterian Church was held last Monday evening. The topic, "Becoming a Christian—Why Not?" was handled in a very helpful manner by Miss Peet. Next week the business meeting will be held.

The slight difference which came between the trustees of the school and Miss McElroy, which resulted in her resignation, has been adjusted and Miss McElroy resumes her duties in the school here. There was something akin to rejoicing among Miss McElroy's former pupils when the news came.

Parkland hockey team expected to come here for a game to-morrow. The team to meet will probably be A. J. Groves, goal; P. Mackie, point; Dudley Munro, center; Adolph Amundson, forward; Jayline, left wing; right. The game is announced for Friday afternoon at 3:30 p.m.

Geo. Devereaux had a birthday last Sunday. Mrs. Hallett gave a little dinner party to celebrate the occasion last Monday evening. A number of invited guests attended, congratulations and helped them on Geo. in a bunch. He is being up bravely under the strain.

In a letter received from Dr. Leam recently he says he has been in New York City and is visiting his time to Gynecology and Discharge of Children. Most of his work is at the Polytechnic Hospital but he takes Children's Clinics at the larger hospital. He expects to continue his studies in New York till the spring.

Beginning last Sunday and should spring for the greater part of the week a fire destroyed a large part of the P. Burns' packing plant, causing a loss of over \$100,000 and besides putting the plant out of commission for the long time necessary to rebuild. Up to the present there has been no report of any rise in the price of meat but it is almost to be expected that with the destruction of such a vast quantity of meat a shortage will be experienced.

Last week A. F. Boniface is reported to have sold out his carpenter business to John Reese, of Wilton. Mr. Reese is a skilled workman as well as a carpenter and took over the business on Tuesday of this week. The addition of an artisan of this kind will be welcome but it is regretted that Mr. Boniface has given up the carpenter business here in as a result he should have our town. It is said to be his intention to remain here for a time at least.

The third lecture in the Epworth League Lecture Course will be held next Monday evening, Jan. 20th. The lecturer G. H. Hunt, B. A., of Calgary, is well known in business and educational circles and his subject on "The Habitual at Home or A Night with Drumshead," is on a

subject with which he is perfectly at home. This should prove a most interesting entertainment and all who recollect the infallible writings of the Post Drumshead will be glad to hear them so capably read and interpreted.

Games in the Calgary Brewing & Malting Co. fixture at the Curling Club show our best teams are as follows: the Cunningham-Brown game in which neither of the skips were present, the skips being skipped by Tilden and Fisher, respectively, 12-4; Rogers 16-10; Fisher 8; Cunningham 17-Langmuir 6; Brown 10-Boone 8; a close game in which the result was in doubt till the last rock was thrown; Reinecke 14-Tucker 8, the latter skip being skipped by Rev. McNeidel, in the absence of Insp. Tucker; Boone 15-Ringrose 5; Moffatt 15-Boone 7; Reinecke 13-Tucker 8; Boone 15-Ringrose 5; Cunningham 12-Simpson 5.

Box at Calgary, Thursday Jan. 20th, to Mr. and Mrs. A. G. Cunningham.

MARRIED: On Friday Jan. 19th, at the home of the bride's father, G. P. Robinson, Leo Henry School and Violet Elsie Robinson, both of Clareholm, by the Rev. McNeidel.

MARRIED: At the Methodist Parsonage, by the Rev. J. M. Harrison, on Tuesday afternoon, Jan. 14th, Robert Howard Whitehead and Miss Elva May Sorenson, both of Clareholm.

It Grows Hair

There are Facts We Want You to Know About Our Hair Tonic

In all our experience with hair tonics there is one that has done more toward gaining our confidence than any other. We really believe this remedy, known as Reaxal "93" Hair Tonic, is superior to all other preparations that we offer it to you with our personal and unqualified promise that if you use it and it doesn't prove in every way satisfactory to you, we will, upon request of our store, return you the money you paid us for it.

Reaxal "93" Hair Tonic acts scientifically destroying the germ which usually originates the baldness. It acts to penetrate to the roots of the hair, stimulating and nourishing them. It is a most pleasant toilet necessity, is delicately perfumed, and will not gum nor permanently stain the hair.

We want you to get a bottle of Reaxal "93" Hair Tonic and use it as directed. If it does not relieve scalp irritation, remove dandruff, prevent the hair from falling out and promote an increased growth of hair and in every way give entire satisfaction, come back and tell us, and get your money back. Two sizes, 50c and \$1.00. Sold only at our store—The Reaxal Store, O. L. Reinecke.

Local Markets

The prices were revised Thursday noon of this week. The live stock market reports will be added next week. No quotations are given on white winter wheat as little if any is marketed here.

A Strictly Cash Business

PRICE

IT COSTS MONEY to buy the best meat for our customers. Large unassorted accounts are not money. We are carrying two kinds of meat. We can give the public the best quality of meat that our LONG EX- PERIENCE in the business enables us to select. We must have the cash to continue to serve the public thus. We announce that our business from now on will be a STRICTLY CASH BUSINESS.

WANTED—Situation as domestic servant, a capable, willing worker. Apply Dorothy Ludbrook, Box 24, Clareholm, or to The Review.

Clareholm Men Buying in Great Falls

Great Falls, Jan. 11.—Today the fact established that the Canadian capitalists who recently caused a furor in early circles by purchasing considerable city and acreage property in Great Falls and district, were not the only moneyed people from the other side of the international boundary who are interested in Great Falls property.

William Monro and two other residents of Clareholm, Alta., having ample financial backing, have been in this city some time quietly picking up desirable and available town lots and acreage property. Although neither the capitalists nor their agents admit the purchases, it is known that a tract of 100 acres south of the city, together with a number of lots on the south side, is such a double corner on Central avenue, have been purchased by the new investors, with a substantial sum of guaranteed money paid down.

William Monro and his colleagues appeared in Great Falls yesterday week ago and immediately set about to line up a number of favorable propositions for purchase. The Canadian capital on their operations in not unpropitious and selective money even putting up a money loan in case needed. Immediately upon arrival they secured and purchased a block of 100 acres of land south of the city, together with a number of lots on the south side, is such a double corner on Central avenue, have been purchased by the new investors, with a substantial sum of guaranteed money paid down.

er important deals are said to be pending and will be announced in a day or two.—Lethbridge Herald.

For Constipation

A MEDICINE THAT DOES NOT COST
AVERAGE PRICES FOR CIGARS.

The active medicinal ingredient of Rexall Orderlies is odorless, tasteless and colorless, is a comparatively new discovery. Combined with other extremely valuable ingredients, it forms a perfect bowel regulator, intestinal invigorant and strengthener. Rexall Orderlies are eaten like candy and are notable for their agreeableness to the palate and gentleness of action. They do not cause griping or any disagreeable effect or inconvenience.

Unlike other preparations for a like purpose, they do not create a habit, but instead they act to overcome the cause of habit required through the use of ordinary laxatives and cathartics and harsh physics, and permanently remove the cause of constipation or irregular bowel action.

We will refund your money without argument if they do not do as we say they will. Two sizes 25c and 50c. Sold only at our store—The Rexall Store, O. L. Reinecke.

Wonderfully Improved

True to promise, the publishers of The Family Herald and Weekly Star of Montreal have vastly improved that already great paper during the past few months. It is said several newspaper editors have been asked to give their opinion of the new issue, and still greater improvements are contemplated. The beautiful picture, "Mother's Treasures," is in great demand. Everyone who sees it wonders how such a picture can be given with such a great paper at one dollar a year. It is the best dollar's worth to be had, and those who miss it will regret it. Old subscribers should see that their personal subscription is sent at once to guarantee the picture.

Only \$50 Offence

T. J. Hamilton of St. Paul, Minn., and T. J. N. D. of St. Paul, Minn., have been indicted for the murder of a woman named Mary. The woman was found dead in a room at the Hotel Hamilton in St. Paul, Minn. The woman was found dead in a room at the Hotel Hamilton in St. Paul, Minn. The woman was found dead in a room at the Hotel Hamilton in St. Paul, Minn.

SIRE AND SONS.

To a friend Edition once confessed, "I haven't used a telephone for two years, and I would not care to try any day to miss an inconvenient light."

Philander Chase Knott, secretary of state, has two favorite games which he plays with skill and enjoyment. One is pool, and the other is keeping his mouth shut.

Thomas William Higgins, who recently won the English channel, being the first man to swim across it, has been named Webb's performance in 1907, is a naturalized Frenchman. However, he was born in Bournemouth, Yorkshire, England.

Earle L. Orvigton has received from Postmaster General Hildreth a document certifying his appointment as the first official airmail carrier in the United States. Orvigton is the aviator who began carrying the mail daily from the Nassau (Long Island) aerodrome during the recent gathering of bird men.

Robert Laird Bowden, who led the Conservative party of Canada to victory at the polls in the recent reciprocity campaign, is a native of Nova Scotia, fifty-seven years old. He is aggressive and uncompromising, looks and acts like a man ten years his junior and enjoys a hard game of cricket or tennis.

Mrs. O'Leary's Cow.

History is remade slowly. Forty years after the Chicago fire Mrs. O'Leary's cow is acquitted of that sick-Nervous Star.

After all these years Mrs. O'Leary's cow has been vindicated. Another instance of the tardiness of justice in America.—Louisville Post.

We are told at the end of forty years it was not Mrs. O'Leary's cow, but presumably a clear throw into a pile of shavings that started the great Chicago fire. What is all very well in the interest of truth and veracity, but it necessarily imposes the enormous task of making adequate amends to the cow.—Leavenworth Times.

College and School.

Norway has only one university, the Royal Frederick university in Christiania.

According to the latest published statistics, there are 10,000,000 women teachers in the public schools of the United States.

Chicago's night schools reopened for the term with an enrollment of 30,000, exceeding previous records by 2,000. The increased attendance is the result of a broadening in the scope of the night school work. A working knowledge of industrial subjects is now obtained as well as commercial and household courses.

Flower and Tree.

There are 700 distinct species of roses in existence.

Palm trees live more than 250 years. The yew is the longest lived of trees.

Plants have sleep periods. Their need of a regular rest is as essential to their health as are those of sleep to animals.

A remarkable tree has been discovered in the remote Lake Chad, in the season it is said to grow to the height of from thirteen to sixteen feet. Its foliage resembles the pine and its branches are thorny.

Ragtime.

A Berlin genius says that ragtime will drive America crazy. The craze of the future tense is but another index of the conservatism of the typical German citizen.—Washington Post.

A Harvard professor likes to remark that "apocryphal harmonization is as immortal a creation," which being roughly translated into idiomatic English, means, "Ragtime is de pure good."—Cleveland Plain Dealer.

Pulpit and Pew.

In and about the Milan cathedral there are 6,000 statues.

St. Paul's cathedral in London is insured in two different offices. The amount is about \$2,000,000.
